SUMMARY

Computer Science student with a strong foundation in **Machine Learning** and **Python**, and hands-on academic project experience. Skilled in **Supervised & Unsupervised Learning**, **Data Structures & Algorithms**, **data preprocessing**, and **model evaluation** using **Scikit-learn, Pandas, and NumPy**. Eager to apply problem-solving skills and technical knowledge to **entry-level roles** in a growth-oriented organization

SKILLS

Programming & Web Technologies: Python, Java, SQL, HTML, CSS, JavaScript, C, problem-solving skill, Adaptability, communication skill
Machine Learning & Data Analysis: Supervised & Unsupervised Learning, Regression, Classification, NumPy, Pandas, Matplotlib, Seaborn Scikit-Learn, data visualization tool like Power BI
Tools, Databases & Soft Skills: MS Excel, Power BI, Git, GitHub, Jupyter Notebook, VS Code, Leet Code, Code Studio, databases MySQL**,** MongoDB**,** analytical thinking, debugging, and team collaboration**,** MS Office Suite

EXPERIENCE

Data Modeling Internship | ***EXCEL, STRATEGIC DATA MODELING***

- Designed **data models** to define eligibility criteria for **premium lounge tiers** using **ticket class, loyalty status, and business rules**, supporting customer segmentation and capacity planning.
- Built **automated lookup tables in Excel** to estimate **passenger volumes**, enabling scalable **demand forecasting**, **what-if analysis**, and operational efficiency.
- Analyzed **Heathrow Terminal 3 flight schedules** by route and time windows to model **lounge demand**, delivering **data-driven insights** to justify **strategic infrastructure investments**.

PROJECTS

House Price Prediction | ***PYTHON, SCIKIT-LEARN, MACHINE LEARNING***

- Developed and deployed an **end-to-end Machine Learning web application**, covering **data preprocessing, model training, evaluation, and inference** using **Python and Scikit-learn**.
- Achieved **~96% prediction accuracy** by implementing a **Random Forest Regressor**, with a robust preprocessing pipeline including **One-Hot Encoding** and **feature scaling**.
- Architected a scalable Streamlit application, integrating CI/CD pipelines and automated testing to achieve 99.9% upti me and zero critical bugs in production during the first quarter.

SMS Spam Detection | ***MACHINE LEARNING ,NLP***

- **Designed and implemented** an end-to-end **NLP-based SMS Spam Detection system** to classify Spam vs Ham using text preprocessing and machine learning techniques.
- **Achieved ~98% classification accuracy** by applying **TF-IDF vectorization** with **Logistic Regression**, trained on **5,000+ real-world SMS records**, with thorough model evaluation.
- **Deployed** the solution as a **real-time Streamlit web application**, demonstrating skills in **NLP pipelines, ML deployment, and Python-based web development**.

CERTIFICATIONS

- Data Science Foundations – ***IBM***
- Machine Learning Using Python – ***SIMPLILEARN***
- Python for Data Science – ***IBM***

EDUCATION

D.Y. Patil Technical Campus, Kolhapur **Expected Graduation - 2027**

Bachelor of Technology: Computer Science (Data Science)
